AI POLICY & GUIDELINES

Use AI. Use it right.

ChatGPT, Gemini, Claude and others are welcome. These rules keep our work accurate and our identity strong.

01

THE MOST IMPORTANT RULE

Never give AI a picture of the Khulafa or the Promised Messiah (as) to edit or to use in a poster.

AI cannot recreate a face exactly. It always changes it, and you can see it when you zoom in.

02

A person checks it

Never publish AI output without reading it first.

03

Verify every reference

Qur'an, Hadith and Jama'at quotes: check them on alislam.org.

04

Check the facts

Names, dates, venues and times: AI often gets them wrong.

05

Keep it private

No members' names, numbers, emails or photos in AI tools.

SECTION 02

AI POSTERS

STAYS INSIDE

Local & Regional events

For Khuddam of the Qiadat or Region. AI is OK, as long as you follow the rules of this policy.

APPROVED BY

Regional Qaid + Regional Nazim Isha'at

GOES OUTSIDE

External & National events

Seen by the public, guests or all of MKA UK. AI can be used to make it, but you cannot publish it without formal approval.

APPROVED BY

Isha'at Approval Committee

THE RULE · EXTERNAL & NATIONAL EVENTS

Any AI poster must be approved by the Isha'at Approval Committee before it is posted.

HOW TO GET APPROVAL

01

Check the level

Local/Regional or External/National? This decides who approves.

02

Add the real logo

Place the official MKA logo file yourself.

03

Send for approval

To the right approvers, with the event name, date and where it will go.

✓

Post it

Only once you have approval.

We are here to help. Isha'at always endeavours to fulfil every design request, InshaAllah.

SECTION 03

THE #1 MISTAKE

AI makes its own logo.

MAJLIS
KHUDDAMUL AHMADIYYA
UNITED KINGDOM

AI-made

Wrong minaret, wrong shapes. Not our logo.

MAJLIS
KHUDDAMUL AHMADIYYA
UNITED KINGDOM

Official

The real file, placed as it is.

OFFICIAL LOGOS · USE ONLY THESE

Black & white only. Never recolour, redraw or stretch.

THE GOAL

Logo files: ishaat@khuddam.co.uk

Only the official MKA logo. On every poster. At every level.

SECTION 04 · EXAMPLE: TABLIGH STALL POSTER

ANATOMY OF A MISTAKE

Looks right. 4 things are wrong.

1 MKA LOGO

Fake logo

AI drew its own Minaret and made it green.

The official logo stays **black & white**. Never recolour it.

SPELLING 2

"Ahmed" is wrong

Huzoor's name is spelt **Ahmad**

3 MOSQUE

Verses turned into a pattern

AI distorted the words on the front of the Mosque.

WEBSITE 4

Made-up website

There is no alislam website ending in .org.uk

THE LESSON

AI invents details. Check every name, word and link before you post.

SECTION 05 · EXAMPLE: ATFAL SUMMER CAMP POSTER

ANATOMY OF A MISTAKE

Looks exciting. But it misleads.

MKA LOGO 1

No MKA logo

AI put its own mosque and minaret icon where the logo should be.

BADGE 3

Invented badge

This Atfal logo was made up by AI.

2 THEME

Misleading setting

What it shows: mountains, forest, sunshine and tents, like an outdoor adventure trip.

The reality: the camp is held inside a Mosque.

The result: Atfal and parents expect something that is not there.

THE LESSON

Show the real event. The poster must match what people will find on the day.

SECTION 06

DASHBOARDS & DATA

Members' data stays on our own platforms.

NOT ALLOWED

Dashboards made on AI tools

No department dashboard may be created on any AI software if it holds personal details of office bearers, Khuddam or Atfal.

- Names
- Phone numbers
- Emails
- Addresses
- AIMS ID

THE RIGHT WAY

Build on official platforms

Any official data platform must be created through the Khuddam website or the CARS platform.

WITH HELP FROM

Isha'at or the IT Committee

NEED A DASHBOARD?

01

Contact us

Speak to Isha'at or the IT Committee about what you need.

02

We build it with you

On the Khuddam website or the CARS platform.

✓

Data stays safe

Members' details never leave our own systems.

THE RULE

Personal data of office bearers, Khuddam & Atfal never goes into AI tools.

SECTION 07

SACRED TEXT & MOSQUES

Huzoor's (aba) Guidance on the Use of AI

QUESTION: HOW CAN WE READY KHUDDAM AND ATFAL TO USE AI BENEFICIALLY?

Explain to your Khuddam and Atfal what AI's own founders, developers, those who provide its programming, or those who have entered this field are now saying against it, so that they remain alert to its dangers... Yes, AI has benefits, and those benefits can be utilised. But to say that we should start relying completely on it – that if translation is to be done, then get that done through AI as well, similarly if letters are to be written – because translation also turns out wrong sometimes.

ARABIC CALLIGRAPHY

Never use AI for Qur'anic verses

AI ruins Arabic calligraphy. Always use authentic calligraphy files, or ask Isha'at.

Recent example: an AI picture of the interior of Baitul Futuh completely ruined the calligraphy on the dome, أَلَا بِذِكْرِ ٱللَّهِ.

TRANSLATION & LETTERS

Do not rely completely on AI

Translation can turn out wrong. Never send an AI translation or an AI-written letter without a person who knows the language checking it.

MOSQUES & JAMA'AT BUILDINGS

Uphold their sanctity

Images on posters must not distort or alter the key features and structural design of a mosque or Jama'at building. Pay particular attention to any text or Arabic calligraphy that may have been changed.

SECTION 08
